SUMMARY

Frontend Developer with 6 years of experience shipping end-to-end web projects and solving real business problems for high-value products with JavaScript. Experienced in fast-changing projects where requirements can shift quickly, so I'm comfortable adapting, thinking about the product, and finding practical solutions. I also enjoy hackathons and coding competitions because they help me grow, work with strong engineers, share experience, and connect with people building startups, Web3 products, and AI-driven solutions.

CORE SKILLS

- **Frontend:** React 18/19, TypeScript, JavaScript, Next.js 15/16 App Router, Server Actions, Redux Toolkit, Zustand, TanStack Query, TanStack Table, Zod, REST, GraphQL, Drizzle ORM, Mongoose
- **Backend:** Node.js, Express.js, NestJS, MongoDB, PostgreSQL, MySQL, Redis, SQLite
- **UI, Styling & Motion:** HTML5, CSS3, Tailwind CSS v4, SCSS Modules, shadcn/ui, Radix UI, Material UI, Framer Motion, WCAG / a11y, Core Web Vitals, Lighthouse
- **Testing & Quality:** Jest, React Testing Library, ESLint, Prettier
- **Web3 & Solana:** Solana Web3.js, Anchor, SPL Token, Solana Wallet Adapter, Pump.fun, Ethers.js
- **AI-Assisted Workflow:** Claude Code, GitHub Copilot, OpenCode, ChatGPT, Codex
- **Other:** Clerk, Stripe, JWT, bcrypt, next-intl, Resend, Upstash Redis, Docker, Nginx, Vercel, Bun, CI/CD, WebSocket / SSE, Three.js, React Three Fiber, Drei, React Spring, GLB/USDZ, Howler

PROFESSIONAL EXPERIENCE

Independent Engineer / Open-Source

April 2026 — Present · Remote

Independent TypeScript products focused on Web3 tooling, real-time interfaces, and production-grade frontend architecture.

- Solo maintaining and shipping private production-grade TypeScript projects for other Web3 trading projects and executing transactions with a 99% success rate on the first attempt in less than 1 second.
- Finished my own P2E/P2O NFT GameFi project in genre roguelike autobattler in a stylized 3D low-poly fantasy world.
- Actively deepening Next.js 16 / React 19 App Router patterns through production-grade side projects.

Senior Frontend Engineer · Bodega Estudio

December 2024 — April 2026 · Remote

Frontend delivery for company dApps and P2E products across architecture, user flows, interactive graphics, and performance.

- Built a scalable Solana wallet authentication system for 1,000+ users, using SIWS-style signed challenges with domain/origin binding, Redis-backed single-use nonces, ed25519 signature verification, and split access/refresh JWT rotation.
- Optimized the main scene by reducing triangle count from 12M to 4M and improving performance by 78% through instancing and custom shaders.
- Owned an interactive Three.js / R3F pipeline with Drei and React Spring for GLB and USDZ scenes holding a stable frame budget across desktop and mobile.
- Hardened the API surface: host / origin / referer guards, redis IP rate limiting, CSRF-safe atomic nonce consumption, geo-IP session enrichment, and structured pino logging.

Frontend Engineer · VGS Co.

October 2022 — November 2024 · Remote

Main company frontend product and internal libraries for wallet integrations, product UI, build tooling, and releases.

- Replaced a legacy wallet connector with a custom integration, scaling supported wallets from 8 to 100+ across several dApps and contributing to a reported 254% user-base increase.
- Shipped production interfaces for wallet authentication, token operations, payment flows, and NFT marketplace UX.
- Owned build configuration, bundle optimization, CI/CD pipelines, and multi-environment deployments for a small product team.

Full-Stack Developer · SSDC Inc.

May 2020 — September 2022 · Remote

Main web developer in a small studio, taking projects through implementation, backend integration, deployment, and support.

- Built the main website for a WAX play-to-earn project end-to-end: frontend, backend integration, wallet auth, and production deploy.
- Delivered the user-facing platform with React, Wax.js, Anchor Link, Node.js, and Express.js.
- Operated the stack on a VPS with Nginx routing and delivery tuning; scaled to 10,000+ users and \$241,525+ in marketplace turnover.

SELECTED PROJECTS

Long Way Up — P2E Game

Stack: Next.js 16 · React 19 · TypeScript · Three.js · React Three Fiber · Drei · Solana Wallet Adapter · MongoDB · Upstash Redis · TanStack Query · Framer Motion · JWT (jose) + bcrypt · Tailwind v4 — [GitHub](#)

Full-stack web3 3D experience: interactive scenes with GLB/USDZ assets, wallet auth with JWT sessions, rate-limited API, and a rich motion-driven UI.

PF-SDK — Pump.fun trading SDK

Stack: TypeScript · Bun · Solana Web3.js · Anchor · SPL Token — [GitHub](#)

SDK for trading Pump.fun tokens — automatic routing across bonding curve, pAMM (PumpSwap), and Jupiter DEX fallback. Slippage protection, priority-fee handling, strict type safety (zero any).

MK-CDT — Solana copy-trading bot

Stack: TypeScript · Bun · Solana Web3.js · Anchor · WebSocket (onLogs) · SQLite · Zod · HTTP + SSE dashboard — [GitHub](#)

Real-time copy-trading bot for Pump.fun: subscribes to a leader wallet via WebSocket, deduplicates signatures, runs a sequential execution queue, and persists trades and positions in SQLite. Live HTTP + Server-Sent Events dashboard for monitoring.

Personal Portfolio

Stack: Next.js 16 · TypeScript · next-intl · Server Actions · Resend · Upstash Redis · SCSS Modules — [GitHub](#) · [Live](#)

Multilingual portfolio in 8 locales with theme persistence, server-side contact form with Resend email delivery, and optional Upstash-based IP rate limiting.

EDUCATION

Kharkiv Technological University IT-STEP

September 2020 — June 2024 · Kharkiv, Ukraine

Bachelor's Degree in Software Engineering — JavaScript, TypeScript, Python, C++, C#, algorithms, data structures, frontend/backend, databases, software architecture, testing, and DevOps.

LANGUAGES

English — Fluent (C1) · Spanish — Working knowledge (B1) · Ukrainian — Native · Russian — Fluent
